

Record Breaker Installation Instructions:

-Isaiah Thacker

1. Obtain Project_1_Iter_2_Software.zip, either from the folder uploaded to Blackboard or by downloading a copy of our GitHub repository.

Repository URL: https://github.com/ThackerCI/Team_One-Platformer

2. Unzip the folder to the location of your choosing.

3. Start Android Studio.

4. In Android Studio, select File -> New -> Import Project

5. Navigate to the location where you unzipped the above folder, and select "OK."

6. Click "OK" in the resulting dialogue box

7. Run the application on the device or emulator of your choice.

Gameplay Instructions:

The red square is the player character. Blue squares are floors and walls (collectively called "blocks".) The black square is the goal object (the "record.")

1. Press "Level 1" to begin the first (and currently only) level.

2. Press L and R (placeholder graphics) to make the character move left and right, respectively.

3. Press the "^" when the character is standing on a block to make the character jump.

4. Press X to fire a bullet. Bullets disappear over time, or when they hit a block.

5. To complete the level, collect the record by moving the character into it.

6. When the level is completed, press the "Return to Menu" button to return to the menu.

7. Press "Level 1" again to restart the level from the beginning.
